Needs a person's judgement

- On hold, not refused: Medicines and drugs (₹20,500).
- 12 bill lines were read as Annexure B non-medical items from their wording; confirm the borderline ones.

Suggested next steps for the reviewer (suggestions, not decisions)

1. Request the pharmacy bills with prescription (prescription) - E.1.7.i.
2. Verify the room category and the hospital's differential-billing tariff before confirming the proportionate deduction.
3. Decide the claim. ARC neither approves nor rejects; the figures above are estimates from the documents.

Basis and limits

- Every amount, date and rule result in this report was computed by ARC's own code from the documents named above. No language model took part in producing it.
- The AI part of ARC is used only to explain the claim to the customer in chat. Nothing from that conversation is in this report, and no what-if figure is either.
- Policy wording: HDFC ERGO my:Optima Secure, UIN HDFHLIP25041V062425. Only this version is loaded.
- Not modelled: IRDAI's longer list of non-payable items, sub-limits, the restore and cumulative-bonus mechanics beyond the amount on the schedule, cashless pre-authorisation, network-hospital lookup, other claims in the policy year, and the 2026 wording.
- Intake reads text PDFs in the layout of the synthetic demo set. A scan, a photo or an unfamiliar layout is reported back to the customer, never guessed at.
- ARC never approves or rejects a claim: an estimate is not a decision.
